

Real math, honest examples.

One structure, the same for every partner. Here is exactly what each kind of sale pays, using current Modern Mustard Seed prices. These are illustrations of the math, not promises of income.

SALE TYPE	YOUR COMMISSION	WHEN IT PAYS
50%	Every product and program bought through your suite or link	The moment the sale clears
25%	Each monthly invoice on a referred subscription, for the first 12 invoices	Every month they stay, for a year
10–20%	Custom builds you bring in (20% at the Producer rate)	When the build is paid

THREE WORKED EXAMPLES

EXAMPLE • PRODUCT

The Builder Bundle

A \$197 product sale, paid at 50% the instant it clears.

\$98.50 TO YOU

$\$197 \times 50\%$. Playbooks run \$47 to \$67 (about \$23 to \$34 each), and the Complete Library is \$247 (about \$123).

EXAMPLE • RECURRING

One AI receptionist

One business you refer onto a Sidekick receptionist at \$297/mo, paid at 25% of each invoice.

\$74.25 /MO TO YOU

$\$297 \times 25\%$, every month for the first 12 invoices. That is up to **\$891** in the first year from one referral, and it keeps paying while you go find the next one.

EXAMPLE • BUILD

A custom build

A \$3,500 project you bring in, paid at 10% (or 20% once you are a Producer).

\$350 TO YOU (UP TO \$700)

$\$3,500 \times 10\%$ at the standard rate. Once you are closing builds regularly, the Producer rate of 20% makes the same project pay \$700.
